CHAPTER 1

Getting Started

1.1 Installation

```
pip install equity-jenga-api
```

1.2 First Things First

1.2.1 Generating an openSSL private/public key pair.

Since **v2** of the API, JengaHQ now requires some APIs to include signatures as a security measure. These signatures are usually generated by signing some request fields with a private key. In order to use JengaHQ you'll have to upload your public key to the developer console on JengaHQ after you generate your key pair.

This Library provides a CLI command to help you generate those keys.

Note: The generated keys will be stored in your home directory under the *.JengaAPI/keys/* folder and this is where by default the Library looks for your private key when initiating JengaRequest Objects.

After Installation, Generate Your Keys using the following command:

```
$ jenga_gen_key_pair
```

Note: Then copy the *~/.JengaApi/keys/publickey.pem* to your developer console on JengaHq.

1.3 Using The APIs

1.3.1 Creating JengaRequest objects

By Design all API classes provided inherit from the *equity_jenga.api.auth.JengaAPI* class which takes the following parameters:

2.1 Jenga Submodules

2.2 equity_jenga.api.auth

2.3 equity_jenga.api.exceptions

Downstream Provider Error responses:

error	900101	Invalid merchant Cipher Text
error	900101	Invalid merchant certificate
error	900101	invalid merchant public key configuration – is empty
error	900101	Invalid merchant public key configuration —Public key is null
error	900101	Invalid merchant code provided

Merchant Authorization:

Status	Code	Response Message
error	401101	Unauthorized
error	401102	Service Not available
error	401103	Service Not available

Merchant Account/ Profile Validation:

error	104101	Validation of account failed
error	104102	Merchant daily transaction limit exceeded
error	104103	Insufficient Funds
error	104104	Invalid charge configuration
error	104105	Server Error
error	104106	Server error - could not save to database
error	104107	Invalid merchant configuration - No billing account found

RTGS:

error	118102	Service Not Available
error	118108	The source account has insufficient balance amount
error	103101	Invalid Account Type.
error	103102	Invalid account number .
error	103104	Insufficient funds.
error	103105	Transfer Limit Exceeded .
error	103106	Request Failed, please contact Bank.
error	103107	Invalid Currency/Transaction Amount.
error	103108	System Failure please retry .
error	103109	System malfunction .

Send Money - Within Equity Bank and Equitel

error	400103	Failed, invalid destination bank account
error	400104	Failed, insufficient funds
error	400105	Failed, general error
error	400106	Failed, destination bank error.
error	400107	Failed, destination bank error. Cut-over in progress
error	400108	Failed, destination bank error. System malfunction
error	400109	Failed, destination bank error. Duplicate transmission
error	400111	Failed, missing parameter in integration to gateway system
error	400112	Failed, could not process this request. System failure.
error	400101	Duplicate Transaction/ Payment Reference
error	400113	Failed, sender daily limit exceeded
error	103120	Failed, banking service could not process the request
error	400114	Failed, unable to process request. Third party is unavailable
error	400115	Failed, unhandled error
error	400116	Failed, 12 digit transaction reference required
error	118110	Failed, maximum transfer amount is 999,999 per transaction

Pesalink

error	100116	Failed, pesalink or destination bank error
error	100124	Failed, invalid amount
error	100128	Failed, pesalink or destination bank error
error	100130	Failed, pesalink or destination bank error
error	100134	Failed, amount less than minimum allowed
error	100207	Failed, destination cannot be found for routing
error	100209	Failed, pesalink or destination bank error
error	100210	Failed, transaction timed out
error	100211	Failed, pesalink or destination bank error
error	100232	Failed, banking service could not process the request
error	400101	Duplicate Transaction/ Payment Reference
error	100222	Failed, suspected fraud
error	400102	Failed, invalid destination bank account
error	400103	Failed, invalid destination bank account
error	400104	Failed, insufficient funds
error	400105	Failed, general error
error	400106	Failed, destination bank error.
error	400107	Failed, destination bank error. Cut-over in progress
error	400108	Failed, destination bank error. System malfunction
error	400109	Failed, destination bank error. Duplicate transmission
error	400110	Failed, bank not on pesalink
error	400111	Failed, missing parameter in integration to gateway system
error	400112	Failed, could not process this request. System failure.
error	400113	Failed, sender daily limit exceeded
error	400114	Failed, unable to process request. Third party is unavailable
error	400115	Failed, unhandled error
error	400116	Failed, 12 digit transaction reference required

Purchase Airtime

er-ror	107101	Service Not available

error	109103	Bill already cleared
error	109104	Invalid service configuration
error	109105	Invalid charge channel configuration code
error	109106	Invalid merchant Outlet code specified
error	109107	Invalid merchant code
error	109108	Invalid request data. Please check your payload
error	109109	Service not available

Receive Payments - Mobile Wallets

error	114101	Merchant not registered for service
error	114102	Amount is below minimum that is allowed for transaction.
error	114103	The maximum amount limit is reached
error	114104	Customer is not registered
error	114105	Maximum daily amount per-day limit is reached for this payment
error	114106	Maximum transactions per-day limit is reached for this payment
error	114107	Invalid parameters. Kindly check with bank team
error	111101	Failed. Invalid input parameters.
error	111102	Bad request - Transaction not found
error	116101	Payment Not Updated

Query Payment

error	112101	Amount paid is less or more than bill amount
error	112102	No transaction found for order ref
error	112103	Bill not found
error	112104	Invalid merchant code
error	112105	invalid service map configuration
error	112106	Due to technical problem we are not able to process your request
error	112107	Invalid service configuration
error	112108	Bill already cleared

Query Bill

error	110101	Invalid merchant code
error	110102	Invalid request data. Please check your payload
error	110103	bill doesn't exist

Generic Error

```
{
  "response_status": "error",
  "response_code": "500101",
  "response_msg": "Generic error. Please contact our support."
}
```

Target Error

200 OK

```
{
  "response_status": "error",
  "response_code": "${.response code}",
  "response_msg": "${.message}"
}
```

`equity_jenga.api.exceptions.generate_reference()` → str
Generate a transaction reference Should always be a 12 digit String

`equity_jenga.api.exceptions.handle_response(response)`
Handles Responses From the JengaHQ API and Raises Exceptions appropriately as errors occur and returns a *dict* object from the *json* response
